ogni prodotto Telcom è il risultato di elevata affidabilità e professionalità

each Telcom product is the result of high reliability and professionalism

modum

Le Giare

La Telcom SPA si distingue per lo sviluppo di prodotti innovativi realizzati in materie termoplastiche, che contribuiscono in vario modo a migliorare la qualità della vita di chi li utilizza, unendo design italiano, solidità e funzionalità.

Elemento determinante del successo aziendale su scala mondiale è la capacità di rinnovare e migliorare costantemente i propri prodotti, grazie all'utilizzo di tecnologie all'avanguardia, alla formazione continua dei propri collaboratori all'interno dell'Azienda ed ad un attento ascolto del mercato.

Telcom, per garantire i migliori prodotti e servizi ai suoi clienti, attua efficacemente una strategia aziendale di integrazione verticale dei processi, valorizzando al meglio le competenze ed il know-how maturati nel corso degli anni.

I designers Telcom ideano e progettano il prodotto nei minimi dettagli, di cui autentici artigiani del legno creano in officina il modello per lo stampo. Ogni linea ed ogni particolare sono curati con meticolosa attenzione, per raggiungere un risultato finale di impeccabile qualità.

Tutti i prodotti della linea Vasar sono realizzati in materiali riciclabili e con formulazioni di materie prime atossiche.

Telcom Spa is distinguished by the development of innovative products made of thermoplastics, which contribute in various ways to improve the quality of life of those who use them, combining Italian design, strength and functionality.

A decisive factor in the success of the company on a global scale is the ability to constantly renew and improve its products, thanks to the use of cutting-edge technology, continuous training of its employees within the Company and attentive listening to the market.

Telcom, in order to guarantee the best products and services to its customers, effectively implements a business strategy of vertical process integration, making the most of the skills and know-how gained over the years.

Telcom designers conceive and design the product in the smallest details, of which authentic wood craftsmen create the model for the mold in the workshop. Each line and every detail are treated with meticulous attention, to achieve a final result of impeccable quality.

All Vasar products are made of recyclable materials and with formulations of non-toxic raw materials.

rotazionale

Lo stampaggio rotazionale offre molti vantaggi rispetto ad altri processi. È una tecnologia molto versatile che produce oggetti resistenti e durevoli, perfetta per creare forme e dimensioni uniche.

Lasciati ispirare dai nostri ultimi vasi.

rotomoulding

Rotational molding offers many advantages over other processes. It is a very versatile technology that produces resistant and durable objects, perfect for creating unique shapes and sizes.

Be inspired by our latest vases.

BOMCORD PV

I

collezione bali

bali collection

Elementi della cultura bohémien e hippy si incontrano nell'isola indonesiana, come in questa collezione di vasi.

La dolcezza prende forma nei raggi accentuati. L'effetto finale, che richiama il tessile, trasmette calore. Nella dicotomia tra naturale e artificiale, ritroviamo uno stile elegante e selvaggio.

Elements of bohemian culture and hippies meet in the indonesian island, as in this collection of vases.

Sweetness takes shape in the accentuated rays. The final effect, which recalls the textile, transmits heat. The dichotomy between natural and artificial represents an elegant and wild style

Come annaffiare

Annaffiare le piante è importante perché troppa o troppo poca acqua può danneggiarle. Un'eccessiva irrigazione può far marcire le radici, mentre un'irrigazione insufficiente può far appassire la pianta.

È importante dare acqua dall'alto con un getto delicato e fate molta attenzione a non bagnare le foglie, se non lo desiderano. Anche il drenaggio dei vasi è essenziale per la salute delle piante. Assicuratevi che il vostro vaso abbia dei fori di drenaggio sul fondo, per consentire il corretto flusso dell'acqua.

How to water

Watering plants is important because too much or too little water can damage them. Excessive irrigation can rot the roots, while insufficient irrigation can cause the plant to wither.

It is important to give water from above with a gentle jet and be very careful not to wet the leaves, if they don't want to. Also the drainage of pots is essential for plant health. Make sure your pot has drainage holes in the bottom to allow the correct flow of water.

le piante pensano

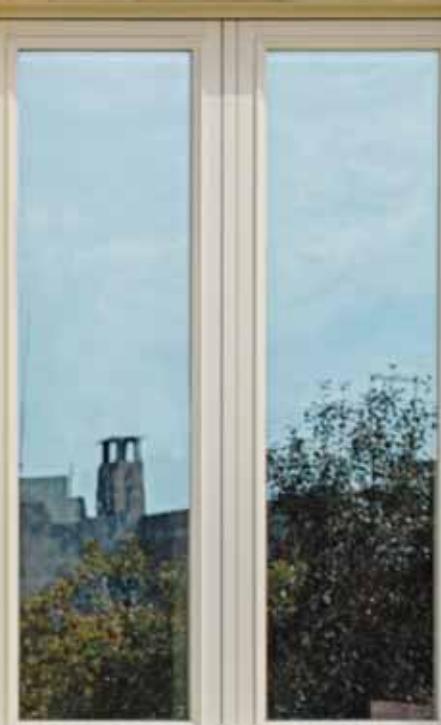

plants "think"

Si dice che le piante pensino e si scopre che non stanno scherzando! Un nuovo studio dimostra come le radici siano in grado di ricordare cose come i livelli di luce o la disponibilità di acqua. Questo permette ai germogli di elaborare un piano d'azione per quando si trovano di fronte a circostanze insolite, come le variazioni di temperatura causate dalle vampate di calore o dai fulmini durante l'estate.

It is said that plants "think" and it turns out that they are not joking! A new study shows how roots can remember things like light levels or water availability. This allows the buds to develop an action plan to cope with unusual conditions, such as changes in temperature caused by flashes of heat or lightning during the summer.

vasi di tutti i colori

Il vaso di plastica è il contenitore più popolare per le piante. È robusto, leggero e facile da trasportare, il che lo rende efficiente in un mondo in cui siamo sempre in movimento. Usa vasi di colori diversi per aggiungere interesse e varietà al tuo giardino.

pots of all colors

A plastic pot is the most popular container for plants. It is robust, lightweight and easy to carry, that makes it effective in a world where we're always on the go. Use pots in different colours to add value and variety to your garden.

iniezione

Lo stampaggio a iniezione permette di fabbricare vasi in plastica di alta precisione, in modo rapido ed efficiente. L'ideale per produrre grandi quantità, senza rinunciare alla qualità. Infatti il processo consente di ottenere eccellenti prestazioni meccaniche ed estetiche.

Scopri tutte le collezioni della linea Flow

injection moulding

Injection molding allows to manufacture high precision plastic pots, quickly and efficiently. Ideal for producing large quantities, without sacrificing quality. In fact, the process allows for excellent mechanical and aesthetic performance.

Discover all the collections of the Flow line

equa

La collezione sostenibile ispirata al Mediterraneo

Equa è un intreccio di radici vere e figurate, contrasti tra pietre ruvide e foglie lisce, finestre aperte sul mare, strade inondate dal sole. Si distingue nel decoro funzionale, nei volumi essenziali e nelle caratteristiche ritmiche della linea. È riciclabile al 100% e realizzata al 100% con plastica seconda vita.

The sustainable collection inspired by the Mediterranean.

Equa is a weave of real and figured roots, contrasts between rough stones and smooth leaves, windows open to the sea, streets flooded by the sun. It stands out in the functional decoration, in the essential volumes and in the rhythmic characteristics of the line. It is 100% recyclable and 100% made with second life plastic

metropoli

I vasi della collezione Metropoli sono il miglior modo per portare la natura in ambienti indoor dal design contemporaneo o per arricchire progettazioni di giardini e roof garden dalle severe geometrie di architettura. Vasi dal carattere sobrio ed essenziale progettati con un unico intento: creare continuum tra spazio esterno ed interno.

The pots from Metropoli collection are the best solution to bring nature to contemporary design indoor areas or to decorate linear geometrical gardens and roof-gardens. Pots with clean and essential shape designed with a unique intention: to create a continuum between outdoor and indoor.

olimpo

Livello del terriccio

Assicurati di utilizzare un terriccio progettato per il giardinaggio in vaso: la normale terra da giardino è troppo pesante e non drena correttamente. Lascia due o tre centimetri dal bordo del vaso.

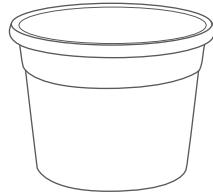

Soil level

Make sure you use potted soil that is suitable for gardening. The normal garden soil is too heavy and does not drain properly. Leave two or three centimeters from the edge of the pot.

Diverse tecnologie di produzione

Una linea di vasi nuovi, diversi, insoliti. Sono vasi che troviamo girando il mondo e che selezioniamo per le loro caratteristiche. Ad esempio, vasi caratterizzati da trattamenti e tecnologie produttive innovative, vasi trasparenti per le orchidee, fino alle piante artificiali. Così da offrire ai nostri clienti un panorama ampio, sul mondo dei vasi.

**Scopri tutti i modelli della linea
Esplorando**

Various product technologies

A brand new and different range of pots selected while strolling around the world, on the basis of their unique features. Starting from vases made through innovative treatments and production technologies up to transparent pots for orchids and artificial plants, we offer our customers a complete overview on the world of pots.

Discover all the models of the Esplorando range.
